

The newly updated Ford FD7200S Canopied Diesel Generator returns with a new design, providing 5.7kW of continuous power and 6.3kW of maximum power, making it an ideal unit for standby and backup usage for domestic and small commercial properties in the event of a mains outage.

With a sound reducing canopy to lower the noise level and weighing just 165kg when dry, the FD7200S can be moved across solid flat surfaces with four sturdy wheels, making it portable and easy to position when needed. The electric start makes getting the generator up and running easier and removes the need to use any recoil method.

The AC output on this generator is stabilised using an Automatic Voltage Regulator (AVR), making it ideal for use on most domestic appliances. The advanced digital display shows the voltage, frequency, power, current, engine temperature, and generator temperature. It also shows the run time of the generator so you can be aware of when to carry out the required maintenance and servicing. A circuit breaker protects each the sockets to prevent damage from overload. A low oil alert also shuts down the engine automatically when low oil is detected.

The 13-litre fuel tank allows for longer running periods of up to 13 hours at 50% load so that you can be sure you are covered for outages that last more than a few hours.

1-year standby warranty subject to manufacturers Terms & Conditions. For full details please see Ford Warranty.

Designed for standby use. For continuous power supply, we recommend a 1500rpm diesel generator.

Please Note: Dual voltage generators may only give approximately 50-60% of the rated output on 115V. Outputs are limited by the size of the sockets, based on the Voltage and Current (Power = Volts x Amps).

- Reliable and efficient 498cc single cylinder, 4-stroke, air cooled diesel engine.
- Powered by easy-to-start electric start.
- AVR regulated alternator.
- Boasting a powerful 5.7kW rated power output and a maximum power output of 6.3kW.
- Low oil alert shuts down engine automatically when low oil is detected.

- Circuit breaker cuts off electricity system when overloaded.
- Full closed control panel dustproof and water resistant.
- Advanced display shows multiple readings including voltage, frequency and run time.
- Four wheel and handles for easier manoeuvrability.
- Sound reducing canopy to lower noise level.

Specifications

Manufacturer	Ford
Product Code	FD7200S
Continuous KVA	5.70kVA
Maximum KVA	6.30kVA
Continuous KW	5.70kW
Maximum KW	6.30kW
Sockets	1 x 32A 230V, 2 x 32A 115V
Fuel Type	Diesel
Run Time at 50% load	13 hours
Noise Level at 7m	72dB(A)
Weight	165kg
Dimensions (WxHxL)	525 x 740 x 950 mm
Fuel Capacity	13 litres
Starting Method	Electric
Frequency	50Hz
AVR	Yes
ATS	No
